### **ELECTION/RESTRICTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to an in situ desalinating system, classified in class 202, subclass 155.
- II. Claims 33-36, drawn to a method or process of desalinating agricultural water, classified in class 203, subclass 10.

The inventions are distinct, each from the other because:

Inventions I & II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process such as: by a continuous vacuum distillation process and other vapor-liquid separation process utilizing solar distillation apparatus without a wick.

Because these inventions are distinct for the reasons given above and have acquired separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
